NATIONAL PROVIDER. NET

We are the trusted technology and services partner for independent medical billers.

Our Critical Differences

We provide a highly usable and integrated EHR and PM software applications designed with the unique needs of the independent medical biller in mind.

We are alone in offering sophisticated services to the independent biller which are integrated in to our technology platform. These services improve a biller's revenue, build stronger provider relationships and reduce transaction costs.

Our culture values each billing client as a partner and because of that we are prepared to make an attractive offer to any billing business on our platform if they are seeking an ownership transition.

NATIONAL PROVIDER. NET

Our EHR and PM applications are seamlessly integrated and create a powerful revenue cycle management tool
- Provider Net EHR is CCHIT certified with a five star usability rating
- Provider Net PM is in wide use

Our applications are cloud based and HIPPA compliant
- We can be accessed 24/7/365 from any location including mobile devices using secure connections. Data is safe and backed up.

Our software-as-a-service (SaaS) business model ensures you will always be using updated software and current payer rules.   Monthly subscription means no large capital investments in expensive to maintain software and hardware that has a limited life

Provider Net
Key Features

Provider Net EHR and PM includes these integrated features:

Appointment book and scheduler

e-prescriptions (Surescripts)

e-lab ordering and result capture

Patient portal

Document management

Documentation templates for nearly all medical specialties

Referral manager

Benefits of Provider Net

Offering a fully integrated EHR and PM application eliminates integration and compatibility headaches and improves efficiency

ePrescribtion and e-lab is included

Be connected in real time with your customers - All information available on the web

Fully electronic office - No need for faxes and manual data entry

Electronic remittance advice and payment posting is in real time and automated.

Denials are easily managed with integrated documentation availability and referral and authorization tracking

Customers get an electronic schedule and appointment application as well as document management software

Financial and collection reports are included and can be customized

Superior technology improves new business prospects for independent billers

Training and Implementation

We emphasize in-depth, professional training as it assures high user satisfaction. We can train your staff and trainers as well as provide training to your providers anywhere in the US

Our on-site implementation support provides critical backup to ensure a "zero fault transition"

Our training includes "meaningful use" focus and the latest HIPPA 5010 standards

Valuable Service Offerings

We help a biller defend their provider relationships by more than offering an integrated EHR and PM technology platform. We also offer other services that providers use. Delivering these services through the biller creates additional fee revenue. Examples include:

- Medical Transcription
- Appointment Reminder via telephone
- Real time eligibility verification
- Document scanning and indexing as well as data storage, back-up and server hosting

We also offer business processing outsourcing services on the same technology platform. We can execute data entry, claim creation and a wide variety of sophisticated services. This creates efficiency and frees resources for higher value added activity.

Wealth Building Opportunity

NPN at a Glance

NPN provides advanced, web-based software applications and services to third-party or independent medical billers

Building on the knowledge and relationship between a medical provider and biller and leveraging the power of "Cloud Computing" we can simplify the complex process of medical record keeping, coding, billing, collection and ordering to improve a medical provider's efficiency and financial results. We are passionate about offering the highest quality technology and services to independent medical billers who share our commitment to quality service.

Provider Net EHR Version 11.0 is a CCHIT Certified 2011 Ambulatory EHR with a Five Star Usability Rating and ONC-ATCB certified as well as given Surescripts® Gold Solution Provider status. Provider Net PM has also been readily adopted in the medical billing community. Our applications are fully integrated and HIPPA compliant and available through the internet with a monthly subscription and are also available in a mobile device format.

For Medical Providers Seeking to:

Improve front desk efficiency

NPN offers real-time, electronic health insurance eligibility verification, authorizations and coverage details.

Easy-to-use medical office electronic appointment scheduler

Simplify and lower technology costs and complexity

NPN's applications are continuously updated to reflect changing payer rules and other enhancements with no disruption.

Medical offices do not need expensive hardware, just an internet connection and common browsers.

Works with standard or touch screen desktops, notebooks, tablets and mobile devices.

Information is backed, secure and is always accessible through HIPPA compliant connections.

For Medical Providers Seeking to:

Improve collections and cashflow

Integrated electronic information reduces billing errors.

Customized *electronic superbills* can be created and submitted with a few clicks.

All claims are checked for accuracy before submission.

Claim status is available online in real time.

Manage denial appeals efficiently with easy access to all documents stored electronically.

Be compensated fairly and bill accurately

Accurate billing increases revenues, cash flow, reduces denials and increases patient satisfaction.

For Medical Providers
Seeking to:

Be positioned for the future of EHR and "cloud computing"

Web-based applications offer many advantages

NPN's application allows providers to create, scan and import documents and images of many file types which are easy to store, secure and retrieve.

Go paperless

NPN can customize electronic versions of patient encounter forms including superbills in use by a provider.

This eliminates the need for faxing, scanning, filing and the data entry errors that inevitably result from paper processing.

If paper or dictated information is preferred such records are stored electronically in the patient record for easy access.

View information about the practice

NPN's applications can produce tables and graphic displays of critical financial and operating performance data

Cash flow can be accurately projected and maximized.

Improve communication between providers, assistants, billers and management

NPN's systems allow easy creation, viewing and retrieval of information as well as messaging between parties

Medical office staff have different levels of authority and access

Participants can work remotely: from another location or home as if they were at the next desk or office

Outsourced medical billing and collection activity can be made much more efficient and accurate reducing its cost
